

I would like to take a moment to oppose to the NAB's petition 04-160. I live in the Los Angeles area and do much driving among our highway system. I benefit greatly from XM Satellite radio's 24 hour up to date traffic and weather information to get around. I do not get this kind of service anywhere else. I am in the transportation industry and it benefits me greatly, as well as my company. I pay for this service and object to the NAB opposing satellite radio. I respectfully urge the FCC to REJECT the NAB's petition 04-160, and support satellite radio to provide instant traffic and weather that I demand and deserve.

Cordially,

Greg Koontz
